SUPPLEMENTARY INFORMATION: We, the USGS, in accordance with the Paperwork Reduction Act of 1995, provide the general public and other Federal agencies with an

opportunity to comment on proposed, revised, and continuing collections of information.

This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A Federal Register notice with a 60-day public comment period soliciting comments on this collection of information was published on June 21, 2018 (FR 83, Number 120, Pages 28860-28861). We did receive one comment but the comment did not address the collection of information on breeding birds.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) is the collection necessary to the proper functions of the USGS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment - including your personal identifying information - may be made publicly available at any time.
